DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 10/21/2008 have been fully considered but they are not persuasive.

In re pages 10 - 11, applicants disclose that the Ogikubo reference does not include a mark type information indicating whether the associated resume information is the most recent information among the multiple resume information.

In response, the examiner respectfully disagrees. Ogikubo clearly discloses date and time information from each user. With the date and time information, a user can clearly detect the most recent resume information among the multiple resume information.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 35 – 40, 42 – 44, 46 – 52 and 54 - 68 are rejected under 35 U.S.C. 102(e) as being anticipated by Ogikubo (US 2003/0063528 A1).

Application/Control Number: 10/783,027

Art Unit: 2621

As to **claim 35**, Ogikubo discloses a method of storing a plurality of resume marks associated with data on a recording medium (fig. 2 discloses a plurality of resume marks. Also see [056]), the method comprising:

Page 3

providing data stored on the recording medium (optical disk D); and storing a plurality of resume marks for a plurality of programs to control each program independently (see fig. 2 and [056]), the plurality of programs corresponding to the provided data, wherein each of the resume marks includes last playback position information (position information) having a presentation time stamp (see [056]) and mark type information (date and time information), and wherein the mark type information represents whether an associated program is a most recently played program (see fig. 2 and [056]) among the <u>plurality of programs having resume marks</u> stored therefor (see fig. 2 and [069]).

As to **claim 44**, Ogikubo discloses a resume mark to control each of a plurality of programs independently which are stored on a recording medium (optical disk D) (see fig. 2 and [056]), the resume mark comprising:

a mark type (date and time information) configured to represent whether an associated program is a most recently played program (see fig. 2 and [056]) among the <u>plurality of programs having resume marks stored therefor</u> (see fig. 2 and [069]).

a program ID configured to identify the associated program (see [061]); and a mark time stamp (position information) configured to represent a last playback position of the associated program (see fig. 2 and [056]).

Art Unit: 2621

As to **claim 47**, grounds for rejecting claim 35 apply to claim 47 in its entirety.

As to **claim 36**, Ogikubo disclose the method of claim 35, wherein the last playback position information includes an address corresponding to a last playback position (see [056]. The above paragraph discloses an address).

As to **claim 37**, Ogikubo discloses the method of claim 35, wherein the storing comprises storing the plurality of resume marks in an apparatus for playing back data recorded on the recording medium (see [056] and [06] – [062]).

As to **claim 38**, Ogikubo discloses the method of claim 35, wherein the plurality of resume marks is identified by numbers (see fig. 2 and [056]).

As to **claim 39**, Ogikubo discloses the method of claim 35, wherein the plurality of resume marks each further comprise program identification information for the associated program (see fig. 2 and [061] – [062]).

As to **claim 40**, Ogikubo discloses the method of claim 39, wherein the program identification information is an intrinsic program ID or a program name (see [061]).

As to **claim 42**, Ogikubo discloses the method of claim 35, wherein the storing comprises storing the plurality of resume marks in a particular field of the recording medium (see [057]).

As to **claim 43**, Ogikubo discloses the method of claim 35, wherein the storing comprises storing a plurality of resume marks for each of the plurality of programs (see fig. 2 and [056] – [057]).

Application/Control Number: 10/783,027

Art Unit: 2621

Page 5

As to **claim 46**, Ogikubo discloses the resume mark of claim 43, wherein the mark time stamp includes a presentation time stamp (PTS) or a physical sector number (PSN) corresponding to an associated last playback position (see [056] and fig. 2).

As to **claim 48**, grounds for rejecting claim 36 apply to claim 48 in its entirety. As to **claim 49**, grounds for rejecting claim 37 apply to claim 49 in its entirety. As to **claim 50**, grounds for rejecting claim 38 apply to claim 50 in its entirety. As to **claim 51**, grounds for rejecting claim 39 apply to claim 51 in its entirety. As to **claim 52**, grounds for rejecting claim 40 apply to claim 52 in its entirety. As to **claim 54**, grounds for rejecting claim 42 apply to claim 54 in its entirety. As to **claim 55**, grounds for rejecting claim 35 apply to claim 55 in its entirety. As to **claim 56**, grounds for rejecting claim 36 apply to claim 56 in its entirety. As to **claim 57**, grounds for rejecting claim 37 apply to claim 57 in its entirety. As to **claim 58**, grounds for rejecting claim 39 apply to claim 58 in its entirety. As to **claim 59**, grounds for rejecting claim 40 apply to claim 59 in its entirety. As to claim 60, grounds for rejecting claim 42 apply to claim 60 in its entirety. As to **claim 60**, grounds for rejecting claim 42 apply to claim 60 in its entirety. As to **claim 61**, grounds for rejecting claim 43 apply to claim 61 in its entirety. As to **claim 62**, grounds for rejecting claim 35 apply to claim 62 in its entirety. As to **claim 63**, grounds for rejecting claim 36 apply to claim 63 in its entirety. As to **claim 64**, grounds for rejecting claim 37 apply to claim 64 in its entirety. As to **claim 65**, grounds for rejecting claim 39 apply to claim 65 in its entirety. As to **claim 66**, grounds for rejecting claim 40 apply to claim 66 in its entirety.

Art Unit: 2621

As to **claim 67**, grounds for rejecting claim 42 apply to claim 67 in its entirety. As to **claim 68**, grounds for rejecting claim 43 apply to claim 68 in its entirety.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 41, 45 and 53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ogikubo in view of Well known Knowledge of the art.

As to **claim 41**, Ogikubo discloses the method of claim 35. However Ogikubo does not disclose wherein the mark type information (date and time information) includes a plurality of values represented by bits.

Official notice is taken that decimal numbers can be easily stored in binary numbers.

It is obvious to one of ordinary skill in the art to have represented the mark type [information (date and time information) in bits rather that in decimal since majority of computer processors represent data in bits.

As to **claim 45**, grounds for rejecting claim 41 apply to claim 45 in its entirety. As to **claim 53**, grounds for rejecting claim 41 apply to claim 53 in its entirety.

Art Unit: 2621

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to OLUWASEUN A. ADEGEYE whose telephone number is (571)270-1711. The examiner can normally be reached on Monday - Friday 7:30 - 5:00 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha D. Banks-Harold can be reached on 571-272-7905. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
